

Mission Statement

AlienScientist.com

February 28, 2010

The mission of AlienScientist and AlienScientist.com is to advance humanity from Type Zero to Type 1.

We live at one of the most remarkable and epic times in all of human history. The transition between Type 0 and Type 1. The "graduation" of the human species to a higher plane of existence, where "intelligent life" can finally prove that it is actually "intelligent".

To assist with progress of the human race toward Type 1 and higher.

Failure will result in extinction of the human race, and is therefor not an option...
